

“Being itself is given to us as meaning. Being does not have meaning. Being itself, the phenomenon of Being, is meaning that is, in turn, its own circulation—and we are this circulation.”

-Jean Luc Nancy

ΣΥΝΑΝΘΗΣΗ | SYNANTHISI

This collaborative work is the culmination of 8 intensive days deep in the tissues of Kefalonia—on its coasts, in its mountains, in its archives, museums, and churches. Our challenge is to think about the human condition, our synergies with plants, animals, the matter around us, and those with whom we build lives of meaning and purpose. ΣΥΝΑΝΘΗΣΗ uses the material and metaphor of wax and encaustic techniques to think about how this meaning is both created and dispersed within the experience of community.
